

Alert Us for Possible Activation

MedStar Alert, a free application for your smartphone, instantly alerts Northwest MedStar and reduces flight response time should air transport be needed.

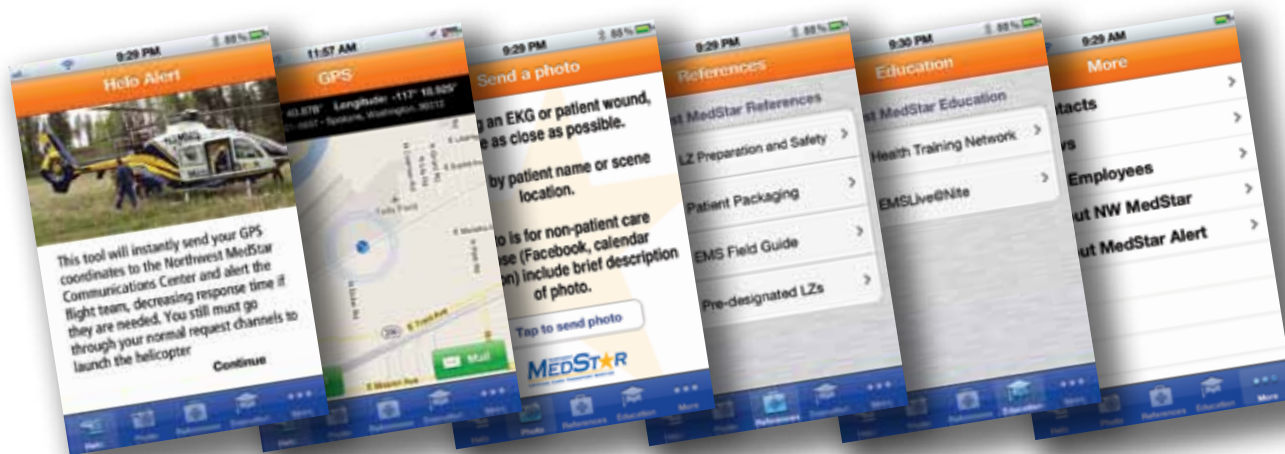

Download MedStar Alert and register. Once authorized you'll be able to:

- Capture and send your GPS coordinates to NW MedStar's Communication Center with the Helo Alert function.
- Receive immediate ETA and availability of NW MedStar's closest helicopter.
- Alert NW MedStar for a possible activation of the critical care transport team and aircraft, reducing response time.
- Continue to communicate with NW MedStar's Communication Specialists through the app as needed.

Available for iPad, iPhone or Android™ smartphones.
Visit your app store for a free download and register.

Everything in one package for EMS and hospital partners:

MedStar Alert Review:

"It gives them the coordinates immediately instead of trying to convey coordinates over radio frequencies. A misplaced decimal, decimal point or a degree off can mean a large difference of location to where the helicopter is going to land."

- Chief Bucy, Stevens County Fire Department 1
